SKILLS

Senior Full Stack Web Developer with 7+ years of experience building scalable web platforms and data-driven marketing solutions. Skilled in PHP, Laravel, JavaScript, SQL, HTML/CSS, and WordPress, developing responsive, high-performance applications with strong attention to UX and technical precision. Experienced in email development and marketing automation through Salesforce Marketing Cloud, HubSpot, Klaviyo, and Braze, including responsive email coding, workflow automation, and technical deliverability (SPF, DKIM, IP reputation, domain alignment). Passionate about clean, maintainable code, automation, and creating seamless, reliable digital experiences across web and email channels.

EXPERIENCE

CodeCrew, USA (Remote) - *Frontend Developer*

December 2021 - PRESENT

- **Engineered responsive email templates** and automated marketing flows, driving increased customer engagement and conversion rates across diverse digital channels.
- **Developed frontend solutions** for websites and e-commerce platforms, ensuring seamless API integrations and optimized user experiences.
- **Implemented advanced personalization** using **AMPscript** within Salesforce Marketing Cloud to deliver dynamic, high-impact campaigns.
- **Architected scalable lifecycles** across leading ESPs, including **Klaviyo, Braze, Iterable, HubSpot, and Mailchimp**, to maintain cross-channel consistency.
- **Managed end-to-end digital initiatives**, balancing technical frontend development with automated marketing strategy to support business growth.
- **Full-Lifecycle QA & Testing:** Managed comprehensive quality assurance for high-volume email campaigns, ensuring zero-error execution of dynamic content and automated triggers.

-
- **Conversion Optimization:** Evaluated campaign performance through rigorous A/B testing and data analysis, refining automated journeys to maximize user retention and ROI.
 - **Journey Integrity Monitoring:** Audited complex automation workflows to ensure data accuracy and a seamless user experience across all digital touchpoints.

Freelancer, self-employed - *Fullstack Developer*

January 2018 - PRESENT

- **Developed responsive, intuitive UIs** from design mockups, utilizing **HTML, CSS, and JavaScript** to ensure pixel-perfect precision and full cross-browser compatibility.
- **Leveraged modern styling and templating tools**, including **Tailwind CSS** and **Laravel Blade**, to build efficient, reusable components and streamlined interfaces.
- **Engineered robust web applications** using **PHP** and the **Laravel framework**, implementing complex business logic and secure authentication systems.
- **Designed and optimized SQL databases** and developed **RESTful APIs** to facilitate seamless data flow and ensure long-term system integrity and scalability.
- **Managed end-to-end web infrastructure**, including **DNS configuration**, hosting environments, and domain security protocols to maintain high platform uptime.
- **Advancing full-stack capabilities** through the implementation of **React.js** and **Node.js** to build modern, component-driven, and highly scalable applications.

EDUCATION

Universidad Politécnica Territorial de Falcón **Alonso Gamero, Coro, Falcon, Venezuela** - *Computer Engineering*

October 2015 - July 2021

- **Spanish:** Native
- **English:** Advanced (C1)
- **French:** Intermediate (B1)

TECHNICAL PROJECTS

- **E-commerce Platforms** – Development and maintenance of WordPress and Shopify stores with integrated payments and shipping solutions, ensuring responsive design and reliable performance.

-
- **Web Applications** – Creation of scalable applications for car rentals, real estate listings, and multi-category marketplaces, using PHP/Laravel, SQL, and RESTful APIs for secure and efficient functionality.
 - **Email Marketing Automation** – Design and deployment of automated campaigns and workflows across Salesforce Marketing Cloud, Klaviyo, Braze, Iterable, and HubSpot, leveraging personalization tools like AMPscript to boost engagement and retention.
